## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Saitoh (6,178,434).

Regarding apparatus, method and computer readable storage claims 1, 3 and 5,

Detecting a directive word, which is a character string that indicates a drawing position (note col. 5 lines 4-7, anchor processing unit detects text such as, above figure, below figure, right figure, left figure and etc the examiner interprets such phrases as a directive word, a character string that indicates a drawing position);

Detecting a drawing whose position is indicative by the directive word (note col. 5 lines 10-14; a figure is matched with directive word (term), thus a drawing (figure) is detected for matching linked with directive word (terms).

Changing a layout of the character string and/or the drawing position (note col. 4 line 50, lines cite changing a format of either drawing or character string).

Recognizing positional relation between the directive word and drawing after layout change (note col. 4 line 50, lines cite position relation between element change,

Art Unit: 2625

examiner interprets format or relative position of certain element (i.e. text or figure note col. 4 lines 41-48) change as positional relation between directive word and drawing after layout change being recognized);

Replacing the directive word based on the positional relations (note col. 4 lines 52-55, the directive word "the above figure" is replaced (altered)).

Regarding apparatus, method and computer readable storage claims 2, 4 and 6,

The detection of the drawing by said second detection means is based on a direction the directive word is directing (note col. 4 lines 20-23, col. 5 lines 7-8 and 11-16, matching examiner interprets as second detection means detects drawing based on link with relative position, which includes directions such as left or right of directive word).
